Streamline solution is subject to meeting and maintaining underwriting qualifications for a merchant account. Streamline product limited to merchants based on bank approval, subject to change based on bank policy.

TRUVANT FINANCIAL IS EXCITED TO ANNOUNCE OUR NEW

Streamline Merchant Product

With a quick scan of a QR code, a small business owner can complete a short, streamlined merchant application to apply for a merchant account. Once approved, the merchant is notified and prompted to download the mobile application (available on iOS and Android) on a smartphone or tablet to begin processing sales.

Marketing materials are available to support conversations and promote the program.

What kind of small businesses are best for Streamline Merchant Product?

Streamline is ideal for small businesses that want to accept card payments using a **smartphone** or tablet, whether processing transactions **face-to-face or card-not-present**. No additional hardware is required to process payments, as our solution features Tap to Pay for both Android and iOS users. The product offers a simple application, straightforward pricing, and functionality comparable to **Square**, making it well suited for merchants with basic processing needs. Streamline is designed for single-user merchants who want a fast, reliable, and hassle-free way to get paid.

The best candidates typically process **\$10,000 or less in monthly card volume** and do not require terminals, inventory management, or advanced integrations.

How does Streamline compare to Square?

Streamline offers functionality similar to Square for basic processing needs, including mobile payments and simple pricing. The key difference is that Streamline is:

- Offered directly through our Bank
- Supported by local, trusted representation
- Designed to keep processing, deposits, and lending relationships with the Bank rather than a third-party fintech

How long does it take to get the merchant setup?

The application process can take less than 10 minutes for the merchant to self-complete from a computer, phone, or tablet. Typically, accounts are underwritten and approved in approximately 1 business day. If further information is needed, the Merchant Services team will contact the merchant directly.

What happens if a merchant outgrows Streamline?

If a merchant's business grows beyond Streamline's ideal use case (higher volume, terminals, inventory management, integrations, or multiple locations), they can be seamlessly transitioned to the Bank's **full-service merchant program**.

What does the Streamline Merchant Product cost?

Streamline features **simple, transparent pricing** designed for small businesses. Merchants pay a **\$10 monthly fee**, plus straightforward two-tier pricing for:

- **Card Present** transactions
- **Card Not Present** transactions
- **No additional hardware required**
